

Welcome to the HP R&D Engineering Seminar Program

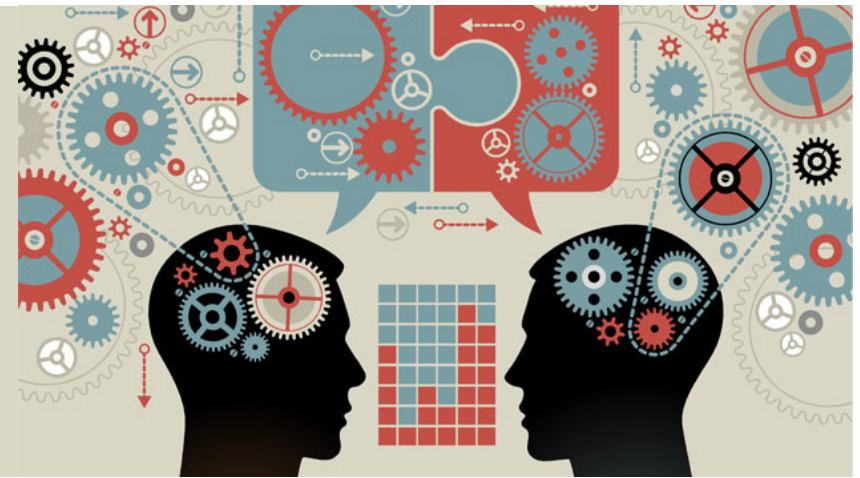

Affinity Groups Series

Today's Topic: Agile Engineering at Scale

Presenter: Chris Browne, Rally

The HP R&D Engineering Seminar Program - Team

The Seminar Program Team have a passion around R&D, so if you have ideas for topics or speakers (internal or external) that you would like to see us host, or if you would like to present yourself, please contact us! Remember this program is for you – our technical community -- and exists because of your support and participation! Tell us who you want to hear from and we'll do our best to bring them to you.

The HP R&D Engineering Seminar Program – About us

About Us!

A dynamic and competitive technological environment requires HP's internal engineering community to keep up-to-date on emerging technologies and on-going research to be able to design innovation into products.

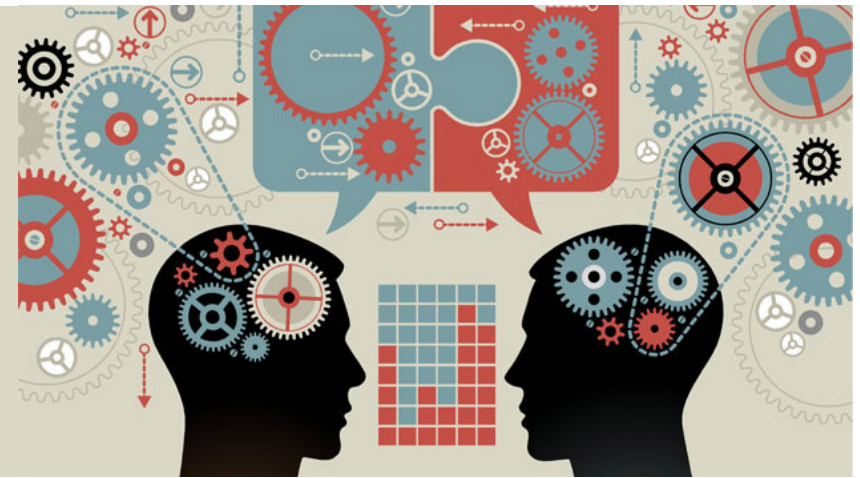

The **R&D Engineering Seminar Program** is an award-winning forum that offers a wide range of technical topics from authoritative presenters internal to HP and across university, consortia and industry. The focus is on technical development work; new technologies relevant to product strategies; quality and process improvement, and research.

Our program provides a comfortable environment for engineers to share technical information, give recognition to each other's achievements, and create synergistic relationships with their peers across our HP Business Units and HP Labs. The program also serves to link our engineering community to the larger global technical community.

We record all our events and make them available on demand. And the best part? Seminars are ***FREE***!

To learn more about our program, view Coming Attractions or launch recorded past event, visit our R&D Engineering Seminar Program at: <https://hrcontent.corp.hp.com/sites/EGLD/RDEngSeminars/ProgramHome.page>

The HP R&D Engineering Seminar Program – Mailing list

If you currently hold an engineering job code or are a manager of engineers in EG, ES, PPS, HPSW, Pre-Sales, OST, Global IT, HP Labs & HP Helion, you **should** automatically be receiving our seminar announcements via Reader's Choice.

If you are not receiving our notices, but would like to, follow the instructions below to set your Reader's Choice profile to receive invitations to upcoming and eLearning seminar events.

We welcome you to our R&D Seminar community!
