List of Figures

1 Introduction

- 1.1 Topic and Motivation
- 1.2 Limitations
- 1.3 Goals
- 1.4 Tasks

2 Smart City and Indoor Positioning Systems

- 2.1 Definition of the Term Smart City
- 2.1.1 What is a city?
- 2.1.2 Definition: City
- 2.1.3 Definitions: Smart City
- 2.2 Positioning in Smart Cities
- 2.2.1 Indoor Positioning System Use Cases

Infrastructure Mode / Active (infrastructure) Sensor

Independent Mode / Active Client

- 2.3 Social Acceptance of new Technologies
- 2.4 Basic Approaches for Indoor Positioning
- 2.4.1 Radio positioning strategies
- 2.5 Constraints
- 2.6 Sensor Fusion
- 2.7 Error correction and Filtering
- 2.7.1 Invalid Position Filter
- 2.7.2 Mask Filter
- 2.7.3 Map Matching

3 Concept of discrete and reliable Indoor Positioning System

3.	1	T	eas		 	L ~
o.	T	IVI	eas	ure	 еп	L٥

- 3.1.1 Trustworthiness
- 3.1.2 Accuracy
- 3.1.3 Expected Cost

3.2 Compared Existing Systems

- 3.2.1 Systems Worth Considering
- 3.2.2 The Comparison
- 3.2.3 The Winner

3.3 Preliminary Consideration of Experiments

3.3.1 Proximity measurements with iBeacons

Hypothesis:

- 3.3.2 Magnetic flux in a house without steel
- 3.3.3 WiFi Fingerprint
- 3.3.4 Internal Sensors
- 3.4 The Concept
- 3.4.1 Advantages and Disadvantages
- 3.4.2 Use Cases covered

4 Conclusion

- 4.1 Reflection
- 4.2 The Result
- 4.3 Future Work

Appendix

- A Further Smart City definitions
- B Experiment Data
- B.1 iBeacon Setup
- **B.2** Raw measurements
- B.3 Locate
- **B.4** Magnetic Flux Sceenshots
